An interdisciplinary offer of

Cardiovascular Research Center Hamburg (CVRC)
University Center for Cardiovascular Science (UCCS)

Universitätsklinikum Hamburg-Eppendorf

In cooperation with

DZHK
DEUTSCHES ZENTRUM FÜR
HERZ-KREISLAUF-FORSCHUNG E.V.

General Information

The Graduiertenkolleg „Hamburg Cardiovascular School“ supports medical students with a particular interest in cardiovascular research.

We offer several scholarships for a 12-month M.D. thesis in clinical or experimental cardiovascular science. This is a unique opportunity to work in world-leading research groups. Regular supervision and a friendly, ambitious environment will nurture good science. Students will be supervised by an interdisciplinary team.

Regular seminars and workshops including presentations and discussions by the M.D. candidates are integral to the programme.

This Graduiertenkolleg is embedded in the Deutsches Zentrum für Herz-Kreislauf-Forschung (DZHK) and its interdisciplinary approach focuses on the improvement of cardiovascular research and scientific education.

Join us for a year of exciting science!

"While working in the CVRC, I was not only able to collaborate with world-renowned experts, I could also get my first author paper with which I am writing my thesis and I was able to present my work at international conferences like the GPCR workshop in Hawaii."

Nefeli Grammatica-Pavlidou

"Our students are an integral part of the team and get access to world-class research starting from basics. The CVRC enables you to present yourself on an international stage with the results of your own scientific work."

Prof. Dr. Cristina E. Molina

Program Overview

Start of the program is October 2024

Your research project

You will work in a leading cardiovascular research group for 12 months on a specific topic. All projects aim to enable thesis by publication.

Seminars

Hear about new results before everyone can read them! Weekly interdisciplinary seminars include external speakers, journal clubs and presentations by the M.D. candidates, spanning the breadth of cardiovascular research in Hamburg.

Workshops

Part of the programme are workshops training you in general scientific skills such as scientific writing, presentation skills, or specific research techniques.

Interdisciplinary supervision

Bring your ideas to life and learn from the experts: Each student works in a research group supervised by an interdisciplinary team of research leaders.

Application Process

- If you are interested, please send your application no later than May 31st to: Claudia Kaß, Institut für Experimentelle Herz-Kreislaufforschung, Geb. W23, Raum 2.23, Martinistraße 52, 20251 Hamburg c.kass@uke.de
- Written application with CV, letter of motivation, copy of certificate of preliminary examination (iMed certificate, Physikumszeugnis)
- 15-min interview (in English or German) by invitation in August 2024
- Project presentation by supervisors in September
